

QUADRUS CORPORATION

*Engineering Consulting | Software Development
Systems Engineering | System Integration and Test
Leadership Development and Training | Smart Cities
Janitorial Services | Additive Manufacturing*

Quadrus Corporation is a small business that provides expert Software, Systems, Test, and Integration Engineering, Technical Services, and Process Development / Training support to complex and highly demanding defense, space, and commercial projects at every lifecycle stage from initial requirements development through verification, certification, and deployment. From research and development to design, testing, and production, our engineers are at the forefront of using cutting edge technology to support our customers needs. Our process enables us to deliver cost reduction and production efficiencies to equip customers for mission success.

DIFFERENTIATOR

Generic Interface Test Computer (GenITC)

- Communications breakout box and a versatile communications and emulation tool
- System Integration Lab (SIL) in-a-box
- Lower cost and shorten schedule
- Lower technical risk and increase quality
- Fully-configurable interface emulator, simulator, traffic-interceptor, and driver

NAICS

323111 – Commercial Printing (except Screen and Books)
332999 – All Other Misc Fabricated Metal Product Manufacturing
332510 – Hardware Manufacturing
332710 – Machine Shops
333249 – Other Industrial Machinery Manufacturing
333999 – All Other Misc Manufacturing
336415 – Guided Missile and Space Vehicle Propulsion Unit and Propulsion Unit Parts Manufacturing
511210 – Software Publishers
541513 – Computer Facilities Management Services
541519 – Other Computer Related Services
541715 – Research and Development
541330 – Engineering Services
541511 – Custom Computer Programming Services
541512 – Computer Systems Design Services
561720 – Janitorial Services
611420 – Computer Training
611430 – Professional and Management Development

CORE COMPETENCIES

SOFTWARE

- Skilled in Avionics, Electrical Ground Support Equipment (EGSE), Special Test Equipment (STE), Instrumentation, and Telemetry
- Extensive experience in the development and integration of software for distributed training and simulation systems
- Highly qualified in GMD tactical communication

SYSTEMS

- Skilled in Hardware and Software-in-the-Loop test environments
- Performed in system architecture, requirements development, and system testing
- Unique perspective into the complexity of developing and implementing engagement solution logic

TEST

- Skilled Avionics Hardware Test Engineers
- Highly experienced in the performance of System Independent Verification and validation operations, procedures, and testing
- Regularly perform as a part of Test Operations Teams for various projects

LEADERSHIP AND TRAINING

- Experience in creating an enhanced work environment with teambuilding activities, time management assistance, capacity building workshops, conflict resolution, and additional training opportunities
- Provide the building blocks for strategic planning through various curricula and training sessions
- Assist in internal and external communications with stakeholders, community leaders, and elected leaders to tell the right story for your organization

JANITORIAL SERVICES

- OSHA-compliant, fully bonded and insured
- Award winning services for commercial cleaning and specialty projects
- Annual performance-based service agreements

SMART CITIES

- Sensor Technology providing Data Acquisition and Analysis
- Specialized Dashboards for Smart Cities, Building, and Home Apps
- Implementation experts for Planning and Project Management

ADDITIVE MANUFACTURING

- State-of-the-art Laser Cusing[®] Selective Laser Melting (SLM) systems developed by Concept Laser GmbH to manufacture advanced, high-performance, lightweight components directly from metal powder
- Metallographic investigation
- Tensile property measurement and evaluation

PAST PERFORMANCE

Space Launch System
(SLS)

Data Analysis and Reduction
Tools (DART)

BA330
Inflatable Orbit Habitat

Radio Frequency (RF)
Generation Technology

Raegan Test Site Telemetry
(RTM) Program

Terminal High Altitude Area
Defense (THAAD)

National Missile Defense
Payload Launch Vehicle (PLV)

Ground Based Interceptor
(GBI)

Multiple Kill Vehicle
(MKV)

Constellation
(Ares I and Ares V)

NASA SBIRS
NAVY SBIRS

Aviation and Missile Research
Development Engineering
Command Propulsion Lab
